AN INDEX TO  
SPEECH MONOGRAPHS  
VOLUMES I-XXVI (1934-1959)

*By*

GILES WILKESON GRAY

## SUGGESTIONS FOR CONTRIBUTORS TO SPEECH MONOGRAPHS

A portion of **SPEECH MONOGRAPHS** is devoted to the publication of articles based on original research, representing the various areas of specialization and techniques of investigation included in the field of speech.

These reports should be given in enough detail to permit the reader to know how the author carried out his investigation and how he arrived at his conclusions. Sources of evidence, conditions of observations, and methods of gathering data should be cited or described. Reports of experimental investigations should follow the usual pattern: statement of purpose, procedures used in gathering data, analysis of data, conclusions. While the inclusion of the data is essential, they should be presented concisely. Tables should be on separate pages. If statistical methods are employed, they should be named, but they need not be described if they are standard, or are adequately explained in some source to which the author refers.

Articles in **SPEECH MONOGRAPHS** vary considerably in length. "Research Notes," 1,000 to 1,500 words in length, will be considered by the Editorial Board when they represent investigations the nature or scope of which permits a brief report without omitting essential details. Authors preparing reports of major studies involving extensive data and/or analysis, and anticipating that their material will exceed 6,000 words, should write to the Editor, inquiring about the availability of space and giving an estimate of the probable length of the material.

Contributors should have their manuscripts read by competent critics before submitting them for publication. When manuscripts are based on dissertations, that fact should be indicated, and the name of the director of the original research supplied. In such cases, the director should review the manuscript. All copy should be proofread by at least one person besides the author before being submitted for publication. The number of words in the copy should be noted in the upper right-hand corner of the first page. Titles should be typed in full capitals, with the author's name in capitals, two spaces below. An appropriate author note should appear at the bottom of the title page. Footnotes should be typed on separate sheets following the last page of the manuscript. They should be double spaced, with triple spacing between items. Authors should retain a duplicate manuscript, and should send a carbon copy to the Editor along with the original. The original copy should be on heavy bond paper.

All manuscripts must conform to *The MLA Style Sheet*, a copy of which may be obtained from the Treasurer, Modern Language Association, 100 Washington Square East, New York 3, New York. Price: 25 cents.

Manuscripts will be read by the Editor and at least two other members of the Editorial Board before a final decision is made. The deadline for submitting final revisions of accepted manuscripts is two months before date of issue. Publication dates are March, June, August, and November. Contributors should keep the Editor informed of any changes in address.

Reprint order blanks are sent to authors; orders should be placed at once with the Arctcraft Press, Columbia, Missouri. Reprints cannot be secured later.

Manuscripts should be sent to Douglas Ehninger, Editor of **SPEECH MONOGRAPHS**, Department of Speech, University of Florida, Gainesville, Florida.

## AN INDEX TO THE SPEECH MONOGRAPHS, VOLUMES I—XXVI (1934-1959)

GILES WILKESON GRAY

### FOREWORD

SOON after the appearance of the *Index* to the first forty years of *The Quarterly Journal of Speech*, inquiries began to arrive concerning the possibility of a corresponding *Index* to the *Speech Monographs*. With the publication of more and more significant material in our research publication, it became increasingly difficult to locate any given item. Fortunately, during the years in which the data for the *Index* to the *Journal* were being compiled, a similar file was being kept of the items appearing year after year in the *Monographs*. The accompanying *Index* is intended to meet for the readers of the latter periodical the same need that prompted the publication of the *Index* to the former.

The general plan of the *Monographs Index* is identical with that for the *Journal*. Entries are provided for the author as well as for the first and every other significant word in the title. Repeated features, such as the Knower Index to Graduate Theses and the Dow Abstracts, are collected into single entries, with specific indications of each appearance, and the whole arranged in unbroken alphabetic order.

Attention needs to be called to certain aspects of pagination that may cause

some confusion if not understood. In Volume 13, for instance, each of the two issues begins with page 1; hence the number of the issue following that of the volume. Three volumes have special issues, each with its own independent paging, which do not all appear at the same place in the volume. In Volume 16, for example, the special issue is No. 3—the volume containing only the three numbers. Numbers 1 and 2 run consecutively from pages 1 to 380, and Number 3 runs from 1 to 124. Similarly, in Volume 23 the special issue is Number 5. Numbers 1 through 4 run consecutively from pages 1 to 304, and Number 5 from page 1 to 106.

In Volume 22, however, the special issue is interpolated between Numbers 3 and 5, and is numbered 4. The pagination, therefore runs as follows: No. 1, pp. 1-78; No. 2, pp. 79-156; No. 3, pp. 157-233; No. 4, pp. 1-159; No. 5 (following No. 3), pp. 235-308.

Otherwise, the paging runs consecutively from the first page through the entire volume.

Although every effort has been made to avoid errors in factual data, it will be surprising indeed if none are found. You will in all likelihood find the correct entry, when such a mistake is discovered, in one of the cross-references.

Abel, James W.: [qu] monosyllables. 25:29  
 ———: Greek and English consonants. 24:1  
 ———: The phonetic contexts of [ɔɪ]. 20:247
